

David Austin

da-austin.com | davidAustin084@gmail.com | (619) 876-7116

EDUCATION

Drexel University | Grad. 2023
M.S. in Mechanical Engineering
B.S. in Mechanical Engineering
3.91 GPA
Pennoni Honors College
Pi Tau Sigma Honors Society
Executive Board | Drexel ASME

CERTIFICATIONS

Engineer-In-Training | Penns.

PATENTS

Non-Invasive Measurement & Calculation System
U.S. Patent 12306048 | 2025

CORE SKILLS

Heat Transfer Analysis
Fluid & Piping Systems
Component Design
GD&T Application
Structural/Stress Analysis
Experimental Test Design
ASME B&PV Code Application

SOFTWARE

CAD: SolidWorks, Fusion,
AutoCAD, Creo, Inventor

Analysis: Ansys Mechanical,
Fluent, MathCAD

Productivity: MS Office, Jira, Git,
Linux/Unix Systems, LaTeX

Coding: Python (primary), VBA,
R, MATLAB, Jupyter

WORK EXPERIENCE

Holtec International **Camden, NJ**
Mechanical Design Engineer *July 2023 – Present*

- Serve as technical lead for forced-convection drying systems, seals, leak-testing equipment, custom high-temperature valves, vacuum systems, and other fluid-handling systems
- Lead design process and drawing development for equipment used in processing, transport, and storage of spent nuclear fuel
- Coordinate with multi-disciplinary teams including thermal, structural, and manufacturing engineers to analyze and validate design proposals
- Perform thermal and structural calculations to support new designs
- Develop and oversee physical test programs to qualify new equipment and processes

Omega Engineering **Bridgeport, NJ**
Mechanical Engineering Co-op *November 2022 – June 2023*
March 2021 – March 2022

- Designed and facilitated commercial launch of a patented non-invasive digital temperature meter for industrial piping systems
- Created and used prototypes and test fixtures for validation of new electro-mechanical designs and firmware for temperature meters
- Coordinated with product managers, technicians, software engineers, and material vendors to design new sensors and smart devices

Cornelis Networks **Chesterbrook, PA**
Mechanical Engineering Co-op *March – September 2022*

- Conducted thermal and mechanical testing of computer server cooling systems including fans, heat pipes, and heat sinks
- Wrote Python software packages to automate server hardware tests and improve CAD data workflow in PTC Windchill

Theoretical & Applied Mechanics Group **Philadelphia, PA**
Advanced Manufacturing Researcher *April 2019 – March 2021*

- Utilized FEA process simulations and topology optimization to counteract heat-related warping of 3D-printed titanium parts
- Simulated and prototyped customized 3D-printed biomedical devices which intentionally introduced warping to reduce fabrication time
